

Taruna Wahyudi

Software Engineer

I am a driven individual with the ability to adapt to any situation and proven potential to grow self and others. I have been developing professionally for 5 years but tinkering since a kid. I started in tech with internships, freelance services and part time positions during college. I have a bit off a diverse job history.

Experience

Jan 2019 - Mar 2023

Dedicated IT

Web Developer

As a web developer, I'm responsible for designing and implementing responsive user interfaces using HTML, CSS, and JavaScript frameworks. On the backend, I manage server-side logic, integrate databases, and ensure optimal performance. I collaborate with cross-functional teams to deliver high-quality solutions and stay updated on the latest web technologies through continuous learning and research.

Mar 2023 - Jul 2023

Martha Tilaar Group

Fullstack Engineer

During my tenure as a fullstack engineer, I developed and maintained front-end and back-end components for various projects. Collaborating closely with designers and team members, I translated requirements into user-friendly interfaces and robust server-side logic. I utilized Laravel Lumen for backend development, crafting responsive interfaces with HTML, CSS, and JavaScript. Troubleshooting, optimizing performance, and staying updated with emerging technologies were also key aspects of my role.

Jun 2023 - Okt 2023

CODE.ID

Fullstack Developer

In my role as a fullstack developer, I spearheaded the development and maintenance of web applications, proficiently utilizing Node.js for backend operations such as server-side scripting, API integration, and database management. Simultaneously, I leveraged WaveMaker for frontend development, crafting engaging user interfaces, implementing interactive features, and ensuring optimal user experience. Through collaborative teamwork and meticulous attention to detail, I translated project requirements into robust technical solutions, consistently delivering high-quality products that met client needs and exceeded expectations.

Des 2023 - Current

Asetku

Backend Developer

As a fullstack developer in fintech, I utilized Spring Boot for backend development, crafting scalable solutions, integrating financial systems, and ensuring regulatory compliance. Collaborating closely with cross-functional teams, I contributed to seamless frontend-backend integration, delivering innovative fintech solutions that drove business growth.
